

DESIGN AND TECHNOLOGY

ABC CREATIVE CRAFT: JEWELLERY

Course Description

Throughout the course students will learn and experiment with a range of jewellery making techniques. They will develop a creative approach through use of primary research and the work of contemporary jewellery designers. Their understanding of jewellery making processes will be assessed on a modular basis throughout the year. There is no exam in this subject.

Modules include:

- modern acrylic and silver jewellery
- Bead work, including making complex beaded structures
- textured silver wrap ring
- Enterprise activities to help fundraising and creating a jewellery brand identity
- precious metal clay and enamelling silver
